EDUCATION

University of Wisconsin-Madison | Madison, WI

May 2028

B.S. in Computer Science + Economics

Relevant Coursework: Programming II & III, Discrete Mathematics, Intro to Computer Engineering, Machine Organization & Programming, Introduction to Algorithms, Elem Matrix & Linear Algebra, Principles of Microeconomics, Intermediate Microeconomic Theory, Statistics: Measurement in Economics, Intermediate Macroeconomic Theory

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java, HTML5, CSS3, C, C++, JSON, LaTeX

Frameworks & Libraries: Node.js, Express, FastAPI, pandas, scikit-learn, React, Recharts, Flexbox, CSS Grid

ML & NLP: Random Forest, FinBERT, transformers (HuggingFace), VADER, feature engineering, time-series cross-validation

Web Development: Responsive design, CSS animations, SVG, DOM manipulation, Intersection Observer API, Web Storage API

Tools & Platforms: Git, GitHub, Vercel, Render, Firebase, Jupyter, VS Code, Android Studio, Figma

Spoken Languages: English, Mandarin Chinese, Spanish

RELEVANT EXPERIENCE

Inspirit AI | Remote

Aug. 2023 – Jan. 2024

Student Ambassador & Researcher

- Collaborated with Professor Clayton Greenberg (UPenn) to co-author a research paper on word reading time prediction and the effects of linguistic factors on comprehension speed, shared with 50+ peers
- Built machine learning models for stroke risk prediction; developed an interactive web tool allowing users to visualize their risk based on historical data, presented to 100+ other students
- Presented research on NLP and language processing applied to stock market analysis

Intel Corporation | San Jose, CA

May 2022 – Aug. 2022

Engineering Shadow

- Contributed to a published research paper on chip PPA (Performance, Power, Area) optimization, contributing to a 4% improvement in PPA metrics
- Shadowed chip design engineers observing real-world performance and power trade-off analysis
- Developed an algorithm to automate subset data selection from large datasets, improving team efficiency by 35%

PROJECTS

THESIS — Thematic Investment Dashboard | Python, FastAPI, scikit-learn, React, FinBERT, yfinance

2026

- Built a live investment dashboard tracking a \$15k portfolio organized by thesis bucket (AI infrastructure, defense, biodefense) — grew to \$400k+ over 3 years before the market priced in these trends
- Python/FastAPI backend fetches 53 tickers via yfinance, scores 2,000+ daily financial news headlines with FinBERT NLP; REST API with rate limiting and input validation deployed on Render
- Trained a Random Forest classifier per theme and per ticker on 3 years of daily price features; 30-day outperformance prediction with time-series CV AUC reporting
- React frontend on Vercel; live at thesis.jeremyxiang.com

The Layering Lab | React, GitHub Pages, Affiliate Monetization

2026

- Built an interactive fragrance layering discovery tool at lab.jeremyxiang.com — users explore curated cologne pairings with compatibility scores and layering rationale
- Affiliate-monetized via product links; static React app deployed to GitHub Pages with zero hosting cost
- Designed full brand identity, UI system, and content strategy; organic growth model targeting low-CAC traffic via SEO and community channels

Personal Portfolio Website | HTML, CSS, JavaScript, Vercel

2026

- Designed and built a minimalist single-page portfolio from scratch — no frameworks, bundlers, or templates; JS bundle under 13 KB uncompressed
- Dark/light theme toggle, Web Storage API persistence, flash-free preload, 20+ custom CSS keyframe animations; live at jeremyxiang.com

CODAworx Product Strategy | PMC Case Competition, RICE scoring, Vercel

2026

- Proposed unlocking multi-juror free trials as highest-impact solution via RICE scoring (108 vs. next-best 32) to remove legal barrier blocking government commissioners from trialing CODAworx
- Built and deployed a live companion website to present findings

Stroke Prediction Web App | Inspirit AI, Python, scikit-learn, pandas

2023

- Trained and benchmarked 8 ML classifiers on Kaggle stroke dataset; selected AdaBoost at 97.3% accuracy
- Shipped an interactive front-end in 1 week — users input 11 metrics and visualize predicted stroke risk in real time

LEADERSHIP & AWARDS

Boy Scouts of America | San Jose, CA

Jan. 2018 – Aug. 2023

Senior Patrol Leader (Eagle Scout)

- Led troop activities and large-scale events; mentored younger scouts and coordinated with recreation staff to design inclusive programming
- Developed and enforced safety protocols; administered first aid and documented incidents per BSA guidelines
- Recipient of the BSA Heroism Award
