✉ jeremy@jeremyxiang.com ☎ (XXX) XXX-XXXX in [jeremy-xiang](#) GH [Jeremy-Xiang](#)

EDUCATION

University of Wisconsin–Madison | *Madison, WI*

May 2028

B.S. in Computer Science + Economics

- Relevant coursework: Introduction to Algorithms, Machine Organization & Programming, Programming II & III, Discrete Mathematics, Linear Algebra, Intermediate Micro & Macro Theory, Statistics: Measurement in Economics

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, C, C++, SQL, HTML/CSS, LaTeX

Frameworks & Libraries: React, Node.js, Express, FastAPI, pandas, scikit-learn, Vite, Playwright, Recharts

ML & NLP: FinBERT, HuggingFace transformers, Random Forest, VADER, feature engineering, time-series cross-validation

Infrastructure & Tools: Cloudflare Pages & Workers, Supabase, Vercel, Render, Firebase, Git/GitHub, Jupyter, Figma

Spoken Languages: English, Mandarin Chinese, Spanish

EXPERIENCE

Inspirit AI | *Remote*

Aug. 2023 – Jan. 2024

Student Ambassador & Researcher

- Co-authored a research paper with Professor Clayton Greenberg (UPenn) on word reading time prediction and the linguistic factors that drive comprehension speed; shared with 50+ peers
- Trained and benchmarked 8 ML classifiers for stroke risk prediction (AdaBoost, 97.3% accuracy) and shipped an interactive web tool visualizing user risk from 11 input metrics; presented to 100+ students
- Presented research applying NLP and language processing to stock market analysis

Intel Corporation | *San Jose, CA*

May 2022 – Aug. 2022

Engineering Shadow

- Contributed to a published research paper on chip PPA (Performance, Power, Area) optimization, contributing to a 4% improvement in PPA metrics
- Developed an algorithm to automate subset data selection from large datasets, improving team efficiency by 35%

PROJECTS

The Layering Lab — Fragrance Compatibility Tool | *JavaScript, Supabase, Cloudflare Pages*

2026

- Built a fragrance layering tool with a custom scoring engine covering 439+ fragrances; live at [lab.jeremyxiang.com](#)
- Supabase backend powers community voting and comments on layering combinations
- Monetized through Amazon Associates and direct affiliate partnerships with fragrance retailers

Thesis — Congressional Trading Tracker | *JavaScript, Cloudflare Workers*

2026

- Tracks stock trades disclosed by members of Congress; Cloudflare Worker cron job fetches Senate and House financial disclosure filings every 6 hours and serves a JSON snapshot to the frontend
- Live at [thesis.jeremyxiang.com](#)

Automated Trading Systems | *Python, Alpaca API*

2026

- Built an opening range breakout bot that executes an intraday momentum strategy through Alpaca, with position sizing and risk limits
- Built an SEC Form 4 scanner that parses insider filings and surfaces trade signals from executive buying activity

Mechanism Lab — Auction & Matching Simulator | *JavaScript, Cloudflare Pages*

2026

- Interactive simulator for auction theory and matching markets (first-price and second-price auctions, deferred acceptance); deployed on Cloudflare Pages with a 3D interface

Personal Portfolio Website | *HTML, CSS, JavaScript*

2026

- Single-page portfolio built with no frameworks or templates; JS bundle under 13 KB uncompressed, 20+ custom CSS animations, dark/light theme with Web Storage persistence; live at [jeremyxiang.com](#)

LEADERSHIP & AWARDS

Boy Scouts of America | *San Jose, CA*

Jan. 2018 – Aug. 2023

Senior Patrol Leader, Eagle Scout, BSA Heroism Award recipient

- Led troop activities and large-scale events; grew troop membership 700% through recruiting and inclusive programming
