EDUCATION

University of Wisconsin–Madison | Madison, WI

Expected May 2028

B.S. in Computer Science + Economics

Relevant coursework: Data Structures & Object-Oriented Programming (Java), Introduction to Algorithms, Machine Organization & Programming (C, x86, Linux), Discrete Mathematics, Linear Algebra, Statistics: Measurement in Economics, Intermediate Micro & Macro Theory

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, C++, C, Java, SQL, HTML/CSS, LaTeX

Frameworks & Libraries: React, Node.js, Express, FastAPI, pandas, scikit-learn, Vite, Playwright, Recharts

ML & NLP: smolagents, HuggingFace transformers, FinBERT, Random Forest, VADER, feature engineering, time-series cross-validation

Infrastructure & Tools: Git, GitHub, Linux, Cloudflare Pages & Workers, Supabase (Postgres), Vercel, Render, Firebase, Jupyter, Figma

PROJECTS

GAIA Benchmark AI Agent | Python, smolagents, Hugging Face

Aug. 2026

- Built a tool-using AI agent (web search, file parsing, code execution) scoring 50/100 on the GAIA benchmark (30 minimum), clearing the Hugging Face Agents Course certification threshold.

Automated Trading Systems | Python, Alpaca API

Jun. 2026

- Developed an opening range breakout bot that executes an intraday momentum strategy through Alpaca, with position sizing and per-trade risk limits.
- Built an SEC Form 4 scanner that parses insider filings and surfaces trade signals from executive buying activity.

Thesis — Congressional Trading Tracker | JavaScript, Cloudflare Workers

May 2026

- Shipped a Cloudflare Worker cron job that fetches Senate and House financial disclosure filings every 6 hours and serves a JSON snapshot to the frontend; live at thesis.jeremyxiang.com.

Other Projects | JavaScript, Supabase, Cloudflare Pages

Feb. – Present

- The Layering Lab: fragrance scoring engine for 439+ fragrances with community voting and affiliate monetization (lab.jeremyxiang.com); Mechanism Lab: auction theory and matching markets simulator with a 3D interface.

EXPERIENCE

AI Evaluation Contractor — Handshake AI (platform) | Remote

Jun. – Aug. 2026

- Wrote golden-solution PRs for real GitHub issues (SWE-bench-style), reading the codebase and producing correct fixes as structured commits (Helix).
- Ranked Codex-style model responses on both code correctness and personality/communication quality (Vox).
- Scored pairs of model responses head-to-head across correctness, tone, and instruction-following (Equator, Latitude, Ouija).

Inspirit AI | Remote

Aug. 2023 – Jan. 2024

Student Ambassador & Researcher

- Trained and benchmarked 8 machine learning classifiers (Python, scikit-learn) for stroke risk prediction across 11 input features, selecting AdaBoost as the top performer.
- Shipped an interactive web tool that scores and visualizes individual risk; presented to 100+ students.
- Co-authored a research study with Professor Clayton Greenberg (UPenn) on word reading time prediction and the linguistic factors that drive comprehension speed; shared findings with 50+ peers.

Intel Corporation | San Jose, CA

May – Aug. 2022

Engineering Shadow

- Contributed to a Python-based automation flow that accelerated memory IP selection for optimal PPA (power, performance, area) in early chip estimation.
- Helped integrate weighted area- and power-driven heuristics to refine and prioritize memory candidates; contributed to a published paper reporting a 4% PPA improvement.

CERTIFICATIONS, LEADERSHIP & AWARDS

Certified: Hugging Face AI Agents Course | Google Project Management (Coursera) | Google Cloud Data Analytics (Coursera) — 2026

Boy Scouts of America | San Jose, CA

Jan. 2018 – Aug. 2023

Senior Patrol Leader, Eagle Scout, BSA Heroism Award recipient

- Led troop activities and large-scale events; grew troop membership 700% through recruiting and inclusive programming.
